

Clinical Team Leader Global Clinical Development

Excellent salary, bonus and benefits package
(Including 64 days paid annual leave)

Based Lyon, France

Sanofi Pasteur (www.sanofipasteur.com) is the largest company in the world devoted entirely to human vaccines. With global headquarters in Lyon, France, the company offers the broadest range of vaccines in the industry, providing protection against 20 bacterial and viral diseases. Demand for SP's vaccines is expected to double within the next five years. The company has an exciting pipeline of prophylactic and therapeutic vaccines against diseases for which there are pressing needs – and is at the leading edge of the response to the global challenge of pandemic influenza preparedness. As a subsidiary of Sanofi Aventis, the company has access to the resources needed to continue its boundary-breaking innovations far into the future.

The Clinical Team Leader is a key member of each global R&D project team. You will bring your medical and clinical research expertise to leadership of your development project, defining and managing the global clinical development strategy conducive to achieving the registration of a new or improved vaccine; this will include design of global clinical development plans and protocols, including the pre clinical/clinical transition, early phase development and critical phase III studies to support regulatory filings. This is a high profile role, demanding a high level of scientific expertise, cross-functional working and effective communication with colleagues in pre-clinical, regulatory affairs, commercial, project management. You will also serve as ambassador for vaccines and Sanofi Pasteur to investigators, key opinion leaders and key policy leaders.

A Physician or PhD scientist, you will have experience in clinical leadership of a development project at a global or regional level, gained either in a pharmaceutical, academic or government setting. You will need to demonstrate an in depth knowledge of the planning, design, implementation and conduct of clinical studies and familiarity with the regulatory requirements leading to global registration and approval. Knowledge of infectious diseases is useful but not essential. You will need to be an able communicator and team leader, able to foster effective communication both internally.

Lyon is the second largest French city; cosmopolitan and vibrant, with a thriving cultural life and a reputation as the gastronomic capital of France. The ski resorts of the Rhone Alps are an hour away; with the beaches of the South of France within a few hours drive. The city is well served by a range of state and private international schools. Full relocation support will be provided.

This is a exciting clinical appointment within a global R & D organisation which is changing the lives of millions of people. To learn more, please call Ruth Stone on +44 (0) 1727 857755 for a confidential discussion. To apply, please email your CV to rs@barrettwebb.com quoting reference BW/554.
